Quality Testing Kits

Detect the microbes that spoil your brew. BREW PLATE, a division of Bioplast Manufacturing, has engineered a collection of prefilled, easy-to-use beer testing kits and bulk plates that detect microbes that spoil beer during the brewing process, saving the brewer valuable time and money. The kit consists of various prefilled plated agar based media, tubes, loops and other supplemental items that allows the brewer to detect a broad collection of wild yeast strains, aerobic bacteria and anaerobic bacteria that contaminate the beer. Each kit is designed to provide the ability to test each batch at up to 5 different testing points such as the Mash/Laurter Tun, Brewkettle, Fermentation vessel, Pasteurization & Bottle/Canning. If contamination is found, the customer can send in the provided ID return sample transport pack to Brew Plate Laboratories for complementary microbe identification.

Equipment & Instruments

We carry a full line of Food and Feed products. These products serve as innovative, reliable and efficient food analyzers for labs, research centers and companies for Nitrogen/Protein Determination (Kjeldahl and Dumas), Solvent Extraction (Soxhlet, Randall), Fiber Analysis (Weende, Van Soest) and other parameters on food, feed and beverages.

Oxitest Stability Reactor

The multi-application Oxitest provides unmatched performance for accelerated oxidation stability tests - without the need for fat separation. Specifically developed for the food, cosmetic, & petrochemical industries, it operates using intuitive & easy-to-use OXISoft software and is ideal for quality control laboratories. No sample prep needed!

Thermal Cycler

Benchmark's TC-32 Mini Thermal Cycler retains the advanced programming features, easy to use software and fast, reliable cycling of the larger TC-9639 Thermal Cycler, but with a smaller block and lower price point.

Designed for lower throughput needs, the TC-32 Mini Thermal Cycler has a capacity for 32x0.2ml tubes. The wells are arranged in a 4x8 format, allowing the block to accept strips of 8 as well as individual tubes.

CATALOG #	DESCRIPTION
26510-T5005-3205-EA	TC-32 Mini Thermal Cycler, 9 x 7" footprint

MyGo Pro Real-Time PCR Instrument

The MyGo Pro real-time PCR instrument provides unmatched performance in a convenient format. Novel Full Spectrum Optics deliver 120 optical channels of fluorescence data from every tube in parallel, with no moving parts, for reliable multiplex PCR.

Monitor Fermentation

from start to finish

Achieve the perfect beer brewing and wine making results with Durac® Triple Scales Beer and Wine Hydrometers. Three scales, Specific Gravity, Potential Alcohol by Volume (PAV), and Brix, provide invaluable data points when crafting beer, wine, cider and more in a commercial brew setting.

Available in 3 styles:

Shatterproof (8-B61800-6100)

- All plastic, shatterproof design removes risk of contamination due to instrument breakage
- Easy to read flat surface design

Polycarbonate (8-B61800-6000)

- Optical quality polycarbonate provides glass-like clarity with shatterproof strength to eliminate the risk of contamination due to instrument breakage
- Color coded bands indicate when fermentation is complete; easy to read font

Glass (8-B61807-7100)

- Standard glass design provides inexpensive fermentation monitoring
- Color coded bands indicate when fermentation is complete; easy to read font

Agilent ULTRA Chemical Standards

More than 7,000 chemical standards, all in one place.

One of the most extensive selections of food, environmental, and elemental analysis reference materials is now available from Agilent through Krackeler Scientific. We support your entire workflow—from instruments, columns, and supplies to decades of application insights. Remember, too, that successfully ensuring food and beverage quality and authenticity depends upon the quality of your reference material. That's why Agilent ULTRA chemical standards are rigorously tested and manufactured under ISO certifications, including ISO 9001, ISO 17025, and ISO Guide 34.

Part of your total workflow solution for food testing.

ULTRA Scientific offers the following standards:

- Organic standards
- Inorganic standards
- Environmental standards
- Pesticide standards
- Wet chemistry standards
- PCB standards
- Ion chromatography standards
- Real World organic soil samples
- Real World inorganic soil samples
- AA/ICP standards
- Explosive standards for EPA Method 8330
- ULTRAcheck blind quality control standards
- Shooters: ready-to-shoot analytical standards
- International environmental standards
- Petrochemical standards
- US State method standards
- Lipid Standards
- GC and HPLC test mixtures

Our Cannabis Catalog

Similar to our Food & Beverage industry offering, we are creating a portfolio of products specifically for the cannabis and botanicals industry.

We have everything a lab needs to comply with mandated cannabis quality testing. We offer the broadest selection of cannabis Certified Reference Materials (CRMs) and analytical standards for cannabinoids, terpenes, mycotoxins, heavy metals, pesticides, and residual solvents. We also provide the tools and equipment needed for sample preparation and handling.

Krackeler Scientific carries many other full lines of analytical standards.

Our portfolio includes

a wide-variety of high-quality certified reference materials from the most trusted manufacturers, including standards for environmental, pharmaceutical, clinical, food & beverage, forensic and petrochemical testing, and much more.

Brands include Agilent Ultra, Restek, MilliporeSigma Cerrilant, High Purity Standards, AccuStandard, Chem Service, and Absolute Standards.

We also offer custom standards.
